E. H. MORROW

COAL DRAY WOOD

CHEAP LUMBER

Of the Best Quality.

Now that Winter is here it is the time to haul your Lumber whether you intend building this winter or next summer.

Don't put off the hauling until your spring work begins, you may have to put your building back for a year.

REMEMBER

We can supply you with all kinds of Lumber at the very lowest price.

THE SILVER CREEK LUMBER CO.,
CREMORA, ALTA.

Local and General

G. W. Boyce will leave next week for Daysland, where he has accepted a position.

S. Timmins, of Calgary, spent the week end visiting his family in Crossfield.

Buyers from all over Alberta will attend Edward's sale next Thursday. Be there yourself.

Sandy McDonald, of Calgary, paid a visit to Jas. Robertson's Ranch at Alenethy, last week.

D. G. Harvie returned to Millet on Tuesday, and Mrs. Harvie and family will follow in a few days, when they will make their home in Crossfield.

With the best Auction Sale ever held in Crossfield will be held by W. B. Edward, at Thursday at one o'clock sharp. Alex MacLean & Co., Auctioneers.

Levi Borden, of Crossfield, was in Crossfield on Tuesday, and re-visited his old acquaintances, the residents of that town, and was well received.

Owing to the storm, the auction sale of horses, which is advertised for Thursday, will be held in Crossfield at the same time.

The yearling colts from the north branch of the Mountain, which were taken back to the Crossfield, will be sold to the hand of the preliminary sale at the same time.

At the town of Crossfield, on Saturday evening, W. B. Edward, appointed Secy. of the Village, Crossfield is fortunate in securing such an able officer, as he has held positions of a similar nature before, and is in position to know what should be done.

Quite a change has been made in the staff of the Canadian Bank of Commerce here this week. Mr. Irvine takes the place of Mr. Patton, who has been transferred, and Mr. Allen is acting here pending the arrival of Mr. Tucker, who is at present on furling, and who will report here to assume Mr. Fraser's place, who has been transferred to Nanton.

J. D. Johnson, of Bottrel, was in Crossfield on Tuesday after his horse, which had been borrowed by the youthful clippers to ride in their get-away. The horse was found safe and sound in McPhee & Wick's Livery Stable, and was turned over to the owner. We understand that another gentleman from that country has a trip to make to Crossfield on the same ground.

CROSSFIELD, ALTA., JAN. 25, 1912

Agricultural Society

The meeting of the Directors of
the Crossfield Agricultural Society
was held on Saturday the 20th inst.
in the I. O. O. F. Hall.

Secretary S. Timmins having re-
signed, E. S. McRory was appointed for
that position.

It was decided to hold this year's
fair on or about the same date as
last year, June 2nd.

A canvas of the community will
be made shortly in the interests of
the memberships for the Society. It
has been decided to put forward
every possible effort to secure a
full membership this year, and it
would perhaps be well to again re-
mind the people of the town and
country that for every dollar paid
for a membership to the Society,
brings an additional dollar from the
Government. It takes a great deal
of money to carry on the affairs of
an agricultural society, and the
cause is most certainly deserving of
heavy co-operation and support.

Mr. E. S. McRory the new secre-
tary has already begun an active
campaign for memberships and for
special prizes for the coming fair.
The Calgary Brewing and Malting
Co., who have been the first to re-
spond, have secured advertising
space in the new prize list, and also
offer a special cash prize of \$5.00
for the best bushel of six-rowed
barley grown in 1911.

Enterprise of this kind on the
part of the Secretary and officers is
bound to make the Fair of 1912 a
greater success than ever before.

Wedding Let.

On Wednesday evening, Jan.
17th, at 7:30 p. m., in St. Michael's
Church, by the Rev. J. G. Hathaway,
Miss M. Hossent and Mr. Leonard
Croft Newson, both of Strathmore,
were united in marriage. The bride
was neatly attired in a white em-
broided robe and a black picture
hat, and was attended by her brides-
maid, Miss Ransford. Mr. Marsden
attended Mr. Newson as best
man. There were many friends of
both parties at the Church. A recep-
tion was held at their rooms
later in the evening and dancing
was kept up until a late hour.—
Strathmore Standard.

Almost everyone in Crossfield
would be pleased to see more local
news in the Chronicle, and as would
the publisher, but we can't manu-
facture news items. If you know
anything of interest tell us about it
and we'll do the rest. Wake up
Spring will soon be here.

When in town on Thursday at
Edward's Big Sale, come in and
pay your subscription to Chronicle.
It will be greatly appreciated, and
we are sure you will feel better.

Farmers get your buildings in-
sured in the Wawanesa Mutual Fire
Insurance Co. It is both economi-
cal and safe. \$1.10 per hundred
for three years. Hultgren & Davis,
Agents.

SYNOPSIS OF CANADIAN NORTH-
WEST LAND REGULATIONS

ANY person who is the sole head of a
family, or any male over 18 years old,
may homestead a quarter section of land.
The homestead must be in Manitoba, Sas-
katchewan or Alberta. The applicant
must be in person at the nearest
land office. This Agency of Settlements
will issue a patent for the land. Every
male at any agency, on certain condi-
tions by father, mother, son, daughter,
brother or sister of intending homesteader.

Duties—Six months residence upon
acquisition of the land in each of
three years. A homesteader may live
within nine miles of his homestead on
a farm of at least 80 acres, solely owned and
occupied by him or his father, mother,
son, daughter, brother or sister.

In certain districts a homesteader in
good standing may pre-empt a quarter-
section alongside his homestead. Price
\$3.00 per acre.

Duties—Must reside upon the homestead
or pre-empt six months in each
of six years from the date of homestead
entry (including the time required to
clear homestead patent) and cultivate
fifty acres extra.

A homesteader who has exhausted his
homestead right and cannot obtain a pre-
emption may enter for a purchased homestead
in certain districts. Price \$3.00
per acre. Duties—Must reside six
months in each of three years, cultivate
fifty acres and erect a house worth
\$300.00.

THE CASE OF GRIP

BY GERTRUDE WARDEN

Author of "Dancing Leaves,"
"The Sentimental," "The
Crimes of Monte Carlo,"
"The Man of the Hour," etc.

WARD, LOCK & CO. LIMITED
London, Melbourne and Toronto

(Continued.)

The landlord, a heavy-cut, depressed looking individual, stared at him in a bewildered way.

No gentleman had come back to fetch papers he asserted, nor had any one of the name of Sarto, or answering to the appearance Harry described, been an inmate of his hotel of late. He even consulted his books in order to make more certain, and when Harry remarked that his acquaintance must have stopped at some other hotel, the landlord became almost aggressive, and assured him that his, the "King's Head," was the only hotel in Blotham, and even the only inn of any importance.

He waxed so quarrelsome over this point that Harry was glad to take refuge in the back-street, in which he parked of a solid mass of hot roast beef, bottled potatoes, greens, custard pudding, rhubarb, and other delicacies, in the society of three farmers, two commercial travellers, and a couple of Cockney cyclists on a holiday tour.

Always ready to interest himself in a fresh experience, Harry, the champion athlete, was a New York college, heir to a colossal fortune, and fond of feasting at some other society, made friends by his simple courtesy with the other guests, and remained to the end of the evening, the ugly mining diadem of East London and the broad, soft, and not inharmonious spectacles of Dorset.

Finally, at eight o'clock, he paid his bill and strode out into the silent streets, without mentioning to anyone that his destination was Crayborne.

"A little village," where there was "nothing to see," but which had been much visited by excursionists years ago when "the crimes were on."

He had not dared to ask about the "crimes," fearful lest they might be connected with the name of Clave, which, as the haze-eyed English actress had told him four months ago, "always brought ill-luck." He was going on a pilgrimage to the home of his ancestors to learn about them die crest, with the reverence for their memory. So he strode on along the lonely road under a radiant summer moon, which shone on fields and tall hedgerows, and through the branches of overhanging elm trees, and here and there on the creamy-white walls of cottages, with low eaves and dormer windows under great roofs of projecting thatch, shut within a few feet of gardens full of sweet-smelling flowers, all fast asleep.

Five or six miles, they told him, lay between Blotham and Crayborne. Something in his blood more than the actual distance taught him that his feet were upon the land where his people had lived and died. And at Crayborne itself, in a little house by the roadside into which he had stepped to listen to a bird's note, his first adventure came to him in a woman's cry for help.

CHAPTER V.

The Lady of the Wood

"I cannot do it! I have done enough for you already!"

The words, uttered loudly and despairingly in a singularly sweet woman's voice, reached Harry's ears immediately after the cry for help. At once he dashed through the brushwood in the direction of the speaker, and came upon two struggling figures, a man and a woman.

The man had one hand upon the woman's shoulder and was grasping her arm roughly with the other. At sight of Harry he at once released his hold and slunk back into the wood; but not before Harry had realized that he was a red-headed, round-backed fellow of loutish, ill-dressed aspect, dressed in the garments of a field-horner.

Clearly he was some importunate rough, threatening a lady; for, even while Harry was turned towards him, Harry knew that the tall figure in a hooded cloak reaching to her feet belonged to a gentleman.

He would have sprung into the woods after the man, but that the lady laid her hand upon his arm to detain him.

"Pray let him go," she said tremulously. "He is not quite right in his head."

BAD CASE OF GRIP

Caused Sore Throat and Tonsillitis. Restored by Peruna.

Mr. W. H. Housley, Greenville, Tennessee, writes: "Five years ago I took a very severe cold which resulted in a gripe. I never was so bad off. I was in bed several weeks, and when I did get up I had tonsillitis and a sore throat."

Mr. W. H. Housley, "I tried to cure this for eighteen months, but it gradually got worse. A doctor advised me to have my tonsils cut, but I did not like the idea. Another doctor examined me, and told me the same thing. I finally got a bottle of Peruna, and after I had taken one bottle my throat was better. I bought and used a dozen bottles, and saw I was going to get well, and I did."

head. I-I have often helped him. "But shouldn't the fellow be taught some lesson," suggested Harry. "Especially if he was already been charitable to him."

"But I want charity," she said, still holding his arm. "I must beg you to let the man go."

He had never in his life heard such a voice as hers. It was sweet and longed to make her speak again. Her manner had a certain authority, as if she were used to command; and he held her in his arm as was determined, so that he could feel the strength in her long, slim, fingers through his sleeve.

He was so convinced that she would be beautiful that it was a small surprise to see her face as she raised it to his. He was nearly as tall as she, and her dark hair, falling away from her hair, seemed like the calyx protecting some rare flower.

Yet, as far as features went, she was not classically perfect. Her outline it was too square, the chin was prominent and a little heavy, the well shaped mouth was large, and her nose small by comparison with the width across the eyes, which were set very wide apart. Harry saw none of the trifling blemishes; nor, indeed, did any man in all this woman's life find defects in her beauty, as he gazed into her shining blue eyes, and watched the slow smile upon her face and curve her mobile lips.

Of course, if you wish it, it will let the man go," Harry said, hardly able to remove his gaze from her delicate features, which seemed to glow with beauty in the moonlight. "But is it safe for you to be in this lonely place, unattended? If I accompany you as far as your home?"

She smiled, and her smile completed the subjugation. For it revealed two rows of small, even, white teeth like a child, and brought a dancing light into her eyes.

"Indeed, there is no danger for me," she said. "I have lived here thirteen years."

She led the way out of the wood on to the high road, where she paused for a moment, with head on one side, as though listening intently. Then she turned to Harry and graciously bent her head.

"Thank you," she said. "For your wish to assist me. Good evening."

She was moving away when he joined her, feeling, indeed, unable to let her go.

"Fardon me," he said. "But you say you live here. Will you tell me whether I am near the village of Crayborne?"

He had walked over from Blotham, and stood on the road, looking at him. "This is Crayborne," she said at last, slowly. "The village is at the bend of the road. I see you are carrying a bag. You surely do not mean to stay here?"

"To his surprise he noted in her voice a sound of annoyance and alarm. He returned, "But there is nothing to see here or to do," she returned eagerly. "Visitors never come. There is no station harbor a few miles out of Blotham, and Rescombe Bay, and here Longford and Cloneworth Abbey, they are all within reach of Blotham. But here there is absolutely nothing."

She spoke more quickly than was her wont, as though insisting upon his departure from Crayborne, and she stopped still in the middle of the road while addressing him, fixing her strangely bright blue eyes upon his face with what seemed an anxious expression.

"Yet you live here!" he said slowly. By the moonlight he saw her face flash faintly, a pale rose tint creeping over her cheeks and her low white brow.

"Ah, I," she murmured, and there was a world of mournfulness in her tone. There are some people who grow up among shadows and cannot bear the sunlight. But Crayborne is

not for the young and vigorous and hopeful. It is a place to dream in, to die in—not to live in.

The words left her lips almost inaudibly. By this time she was the spell of her beauty and her strange, commanding personality in the unreal moonlight that Harry Clave felt ready to live anywhere to be near this unknown lady of the wood.

"I have come a very long way to see this part of the world, and I cannot leave it before I have explored it thoroughly."

"I have told you there is nothing to see," she said. A new staring brick inn, a few cottages and one or two shops of all sorts, a ruinous manor-house by a sluggish stream, a mouldering abbey, then trees and fields and a dairy farm or two. That is Crayborne."

"To an American it sounds enchanting," Harry assured her. "I have travelled this way just to see ruined manor-houses by sluggish streams, and mouldering abbeys. And a few ghasts. Crayborne would realize my ideal."

"Oh, there are ghosts enough," she exclaimed with a shiver. "There are ghosts everywhere if we have eyes to see them. I have seen them in the fellow says. 'All houses wherein men have lived and died are haunted houses. We evict our own ghosts wherever we go.'"

"I have not enough imagination for that."

"Perhaps you have not enough to see them. I have seen them in the fellow says. 'All houses wherein men have lived and died are haunted houses. We evict our own ghosts wherever we go.'"

She looked full into his face as she spoke, with her own head in shadow as the moonlight fell on his. They were walking slowly down the road in the course of this talk, and after they had passed the manor-house and some scattered buildings at a little distance, he was afraid lest at any moment she might dash him, so he caught up the talk lest the pauses might suggest to her the opportunity.

"I have come to Europe to get some memories," he observed. "At present I have only sport, amusement, college life and modern comforts photographed in my brain. I have been with my people to Paris, Rome, Vienna, Nice, London, and Florence during their seasons; but I have only a kaleidoscopic recollection of the world about them."

"England is full of such places," she exclaimed impatiently. "Why come here?"

He felt that he must tell the truth to the lady of the wood.

"I have come here," he answered slowly, "because I am on my way to Lyllynton Court, where my father was born and where my ancestors lived before him. I can dream about them."

"It is not true."

He felt almost short in his walk, and spoke in a tone of excitement. He felt he could answer her broke out again, her melody of a sounding almost sharp in her agitation.

"You are an American, and of course, you cannot know what you are saying. Someone has been deceiving you, inventing a pedigree for you. I have heard of such things being done. Your ancestors may have been English, but they cannot have lived at Lyllynton Court. The place was built nearly three hundred years ago."

She hesitated for a moment, before that they lived at a manor-house here in Crayborne, and hunted on the land of Lyllynton Court now stands. No one else has ever owned the estate or lived there, until quite lately.

She had named short in his walk, and spoke in a tone of excitement. He felt he could answer her broke out again, her melody of a sounding almost sharp in her agitation.

And of the old family, not one member exists; not one!"

She spoke the words defiantly. He could see that she was trembling from head to foot. Her excitement communicated itself to him, and he felt half afraid to pursue the subject.

"The name of the family was Clave."

She put up her hands to her ears. "Don't let me hear the name!" she murmured in a low, frightened voice.

"No one speaks it here, I hate the sound of it!"

"That is what everyone says," he remarked, "and I cannot tell why. Yet must find out, for my father was a Clave."

(To be Continued.)

An aged colored man was engaged in burning the grass off the lawn of a young broker when the latter returned to his home, and, thinking he was some fun with the old man, said: "Sambo, if you burn that grass, the entire lawn will be as black as you are."

"Dat's all right, ah!" responded the negro. "Some o' dese days dat grass grow up an' be as black as you are."

"What was the trouble?"

"The moving picture films gave out."

Of the 12,000,000 tons of iron ore which Spain mines, and sends to other countries, only 2,000,000 tons are used at home, the rest being exported.

Facts for Weak Women

Nine-tenths of all the sickness of women is due to some derangement or defect of the organs distinctly feminine. Such sickness can be cured—i.e. cured every day.

Dr. Pierce's Favorite Prescription

It Makes Weak Women Strong, Sick Women Well.

It acts directly on the organs affected and is at the same time a general restorative tonic for the whole system. It cures female complaint right at the privacy of home. It makes unnecessary the disagreeable questioning, examinations and local treatment so universally insisted upon by doctors, and so abhorrent to every modest woman.

We shall not particularize here as to the symptoms of these peculiar affections incident to women, but these waiting full information as to their symptoms and means of positive cure are referred to the People's Common Sense Medical Adviser—1008 pages, newly revised and up-to-date Edition, sent free on receipt of 50 cent stamps to cover cost of wrapping and mailing, sent by Express, or by mail, to Dr. R. V. Pierce, No. 663 Main Street, Buffalo, N. Y.

The various uses to which Concrete may be profitably put, on the farm, are plainly and simply in our 166-page book,

"What the Farmer Can Do With Concrete"

which shows how the following farm buildings and utilities can be constructed of concrete—

Barns, Cisterns, Dairies, Dipping Tanks, Foundations, Fences, Posts, Paving Blocks, Gutters, Hoof Beats, Hatching Pans, Horse Blocks, Houses, Poultry Walle, Sheds, Stairs, Stalls, Staps, Tacks, Troughs, Walks, and so forth.

Send for it—free—through it regularly sells for 10c. Write to-day.

Can you send me a copy of "What the Farmer Can Do With Concrete?"

Here's the biggest can of easy-shining stove polish on the market.

BLACK KNIGHT STOVE POLISH

It's a neat—easily applied—and gives a brilliantly black polish that is not affected by the heat. Specially good for stoves, pipes, grates and iron work.

If your dealer does not carry "Black Knight" Stove Polish, send us his name and he will send a full size tin by return mail.

THE F. F. DALLEY CO., LIMITED, Montreal, Que.

Makers of the famous "3 in 1" Shoe Polish.

The Man of It

Mrs. Reed (of the magazine)—Here's a fine photograph of a jury of California women and they appear to be paying close attention to a woman witness.

Mr. Reed (allegedly)—Yes. What is she wearing?

"I envy the man who believes that superstition about Friday," said Mr. Grover.

"I consider it depressing."

"Not at all. A man ought to be mighty comfortable who can feel sure there's only one unlucky day in the week."

PERKINS EXPLAINS

Tells His Wife Why He Buys Flour by the Sack.

HE DELVES INTO PHILOSOPHY

Many Reasons Accuse Him in Refusing to Have a Barrel of Flour in the House, the Principal One Being That It Cost Him His First Wife—One Reason Unheard.

—By M. QUAD.
Copyright, 1911, by Associated Literary Press.

MR. AND MRS. PERKINS sat by their evening fire, and all was content, when Mrs. Perkins suddenly observed: "I declare I must be getting forgetful. I meant to have told you this afternoon that the flour is due."

"I will order a sack tomorrow," replied Mr. Perkins without interest.

Mrs. Perkins said no more for five minutes, but she had something on her mind. She glanced around in her chair, glanced about the room and finally remarked:

"We have been married about five years."

"Four years, eleven months and twenty-one days," replied Mr. Perkins after consulting his memorandum book.

"And the first flour you bought after we started keeping house was a twenty-five pound sack?"

"I remember as well as if it happened only yesterday."

"You came up the street luging it on your shoulder."

"I asked you why you don't buy flour by the barrel and have it sent up, and you said you would."

"Flour in Small Sacks."

"But you have never done it. At intervals you have come luging another sack. Every one around here knows

"Ninthly, between the time you buy a twenty-five pound sack of flour and use it up there can be no great advantage to the price."

"You buy a whole barrel you may find yourself as much as a dollar the loser. A dollar lost much to lose at one time, but suppose we go on and buy a thousand barrels of flour and lose each time?"

"Tenthly—"

"And you call this philosophy?" said Mrs. Perkins as she rose up.

"One Reason is Wasted."

"The jury will please keep quiet," he answered. "I am on trial and making my defense. As I was about to say—"

"Eleventhly, four kept in a barrel is bound to deteriorate. It must lose more or less of its nutritive qualities. If broken, crumbs and soup bones, and hammers, nails, brooms, and other things are spilled into it it becomes a source of danger. Mrs. Perkins, suppose I am eating a hot pepper spread in clover honey—such a thing is not likely to happen, but suppose it does—and I swallow it can opener that was dropped into the flour barrel. What is the result?"

"It is a sack hammer tested."

"It is your best counter, honey—answer me impetuously and without due thought, but take half an hour to think of it. When you have answered we will take up the twelfthly."

"Then I'll never answer!" exclaimed Mrs. P. as she bounced out of the room.

"Gone!" sighed Mr. Perkins as he looked after her. "Gone, and she will never know that—"

"Eleventhly, I must reduce the sacks to ten pounds after this, owing to my capital being tied up in codfish."

Glycerin Increases in Price.

During the last eighteen months, says the London Spectator, the price of glycerin has risen over 50 per cent, and a few days ago the price of glycerin on record was touched. There being a further advance of 15 per cent. This great rise in price affects many industries and is said to be due largely to the scarcity of fat and oils from which glycerin is made as a byproduct in the manufacture of soap and the increased demand for glycerin for the manufacture of high explosives, great quantities of which are required for the construction of the Panama canal and other great engineering works.

Canada's Available Water Power.

According to official estimates made by the department of the interior, the available water powers of the Dominion of Canada are capable of developing 30,000 horsepower, which if produced from coal would represent a consumption of more than 300,000,000 tons per annum, at the rate of 23.9 tons of coal to the horsepower.

BRIDGING OVER THE FLOUR.

that we got four twenty-five pounds at a time. It has always been painful and embarrassing to me. Is there any reason why you don't buy a barrel at a time, as most other folks do?"

"Mrs. P., here is a thing to be talked over and fully analyzed and explained, and I hope to find you concurring. When a man buys flour by the sack instead of the barrel he must have an object in view. There must be a strong motive behind it. He must be guided by some sort of philosophy instead of a mere whim."

"Oh, if you are going to lug in philosophy I don't want to hear any more," said the wife. "You'll always bring in what you call philosophy to help you wrangle out of things."

"But I have explanations and insist they be heard. It is due to me as a husband and provider. You are Mrs. Perkins No. 2. Mrs. Perkins No. 1, as you have been told, met her death by accident. She was limping across the street when a car struck her. Had she not been limping she could have got out of the way. Why was she limping? Because, my dear Mrs. P., she had broken a rib while bending over the four barrel to scrape the bottom. This whole question starts right there."

"Because she bent over the four barrel?"

"You would do the same. No use to flapsie flaps. You might bend over the four barrel fifty times and not break a rib, but there would be a fifty-first time. Having lost No. 1, that way, do I wish to lose No. 2?"

"There's all that!" exclaimed Mrs. Perkins, with heightened color, "and if we can't talk about your dragging in the fact that you were a widower when I married you then we won't talk at all!"

Reasons Given Barstain.

"That is, we will confine ourselves to the four question. You are asking why I haven't bought it by the barrel instead of the sack. I will answer:

"Firstly, you might have broken a rib."

"Secondly, the wife who drives into a flour barrel naturally uses more than the one who drives into a sack—a question of domestic economy, you see."

"Thirdly, in buying by the barrel you have to pay for the barrel, which is no good to you."

"Fourthly, the neighbors can't tell to this age of deception whether the barrel contains sawdust or flour, so nothing is gained in the way of prestige."

"Fifthly, in case the house burns up you lose a barrel instead of a sack."

"Sixthly, mice will get into a barrel where they can't get into a sack, and the same with bugs."

"Seventhly—"

"Oh, let it all go!" said Mrs. Perkins as she turned her back away to despair.

Must Defend Himself.

"But we can't, my dear," he answered. "I have been charged with the heinous offense of buying flour by the sack instead of the barrel. You are the jury to hear the case. I must go on."

"Seventhly, now and then I receive a dollar or so of a neighbor to help me out of a pinch. I don't always pay it back with promises and dispatch."

If he sees a twenty-five pound sack of flour come here he knows I am still hard up. If he sees a barrel of flour he will wait on the corner to dun me, thinking I am on my knees again. You cannot fail to see that there is a business point to it."

Eighthly, there is a vast difference in going into a grocery and ordering a barrel of flour and a small sack. When your credit is a little shaky and you are buying the grocery gets a jar. When you say sack he takes chances."

"And I've married a man who can't pay for a barrel of flour!" exclaimed Mrs. Perkins.

Capitalists in Straits.

"Not at all, my dear. You have married a man whose capital is sometimes temporarily tied up. There are times when Mr. Rockefeller has to run his face for a bunch of shingles to repair the roof of the smokehouse. Capital comes and goes, you understand. Some days a capitalist has millions at his command; again he has to beat the street car. I will now proceed."

"Ninthly, between the time you buy a twenty-five pound sack of flour and use it up there can be no great advantage to the price."

"You buy a whole barrel you may find yourself as much as a dollar the loser. A dollar lost much to lose at one time, but suppose we go on and buy a thousand barrels of flour and lose each time?"

"Tenthly—"

"And you call this philosophy?" said Mrs. Perkins as she rose up.

"One Reason is Wasted."

"The jury will please keep quiet," he answered. "I am on trial and making my defense. As I was about to say—"

"Eleventhly, four kept in a barrel is bound to deteriorate. It must lose more or less of its nutritive qualities. If broken, crumbs and soup bones, and hammers, nails, brooms, and other things are spilled into it it becomes a source of danger. Mrs. Perkins, suppose I am eating a hot pepper spread in clover honey—such a thing is not likely to happen, but suppose it does—and I swallow it can opener that was dropped into the flour barrel. What is the result?"

"It is a sack hammer tested."

"It is your best counter, honey—answer me impetuously and without due thought, but take half an hour to think of it. When you have answered we will take up the twelfthly."

"Then I'll never answer!" exclaimed Mrs. P. as she bounced out of the room.

"Gone!" sighed Mr. Perkins as he looked after her. "Gone, and she will never know that—"

"Eleventhly, I must reduce the sacks to ten pounds after this, owing to my capital being tied up in codfish."

COTTON SEED FOR FATTENING CATTLE.

Cotton seed may be fed to steers with good results, although the usual practice now is to feed the cottonseed meal remaining after the oil has been expressed in the mills, says the Breeder's Gazette. The cotton seed has a pronounced laxative effect if fed heavily. This may be overcome in part by cooking the seed and any event the best results are obtained by feeding not over six pounds of seed daily per head with a heavy feed of corn or kafir corn.

In some tests cotton seed has given better results than cottonseed meal, but in most instances the reverse is true. In some Mississippi tests it was found that one pound of cottonseed meal was equal to 1.6 pounds of cotton seed or 1.2 pounds of corn, while one pound of cotton seed equaled 1.2 pounds of corn. Where it is desired to make a large use of cottonseed meal it may be fed for ninety days to the

One of the objections to which the breeders of live stock are sometimes subjected by the remarkable rebound shown by the Harford of late, says the Kansas Farmer. This has been the case with the breed of cattle which has had the Harford pedigree, and yet it has seemed to be on the toboggan with the Harford. The Harford has ever, there has been a surprising renewal of interest, and this has been shown at all the big state fairs in the corn belt, with a culmination in the show ring and sales of the American Royal. Various causes are assigned for the "come back," among which are the growing scarcity of best animals and the consequent revival of interest in this breed of rustlers and the inherent excellence of the breed. All these may have been factors, but the early maturity and the producing qualities are probably the most potent. The illustration shows a typical Harford.

extent of eight or ten pounds daily per head without experiencing the injurious effects that sometimes attend a longer period of such heavy feeding. Cottonseed hulls make a good roughage to use with it, and corn in addition adds to the rapidity of gain.

A product known as cold pressed cottonseed cake or caddo cake is made from the crushed seed uncooked and without removing the hulls. This is more bulky and coarser than cottonseed meal, and it is claimed that the preparation without heating leaves it more digestible. It may be fed heavily with comparative safety and produces larger gains than its composition would lead one to expect. To get the largest gains with any feed derived from cotton seed it is necessary to feed corn in addition.

Pumpkins For Cows and Hogs.

Pumpkins have been in use for feeding cattle and hogs for many years and are raised very largely in some communities. They are especially valuable for starting hogs on a ration of corn, raised very largely in some communities. They are especially valuable for starting hogs on a ration of corn, raised very largely in some communities. They are especially valuable for starting hogs on a ration of corn, raised very largely in some communities.

The first lot made a daily gain per pig of 1.12 pounds, while the latter made a gain of 2.36 pounds—F. G. King, Iowa Experiment Station.

Poison For Flies.

Formal has been recommended as a fly poison by several writers who have studied its action and the best way of using it, says the Scientific American. It is necessary, in order to obtain good results, that the formal shall be swallowed by the insect; hence the flies must be attracted to the poison by mixing it with an appetizing food and by spreading the mixture over a large surface. Honey has given poor results. The best mixture is that of formal with 10 per cent of molasses. The best results are obtained by using a solution containing 10 per cent of the formalin with 10 per cent of molasses, placed in large flat vessels. Most of the dead flies fall not within the vessels, but around them sometimes at a great distance.

THE MICROBE OF GOUT.

French Scientist Thinks He Has Discovered Cause of Disease.

Chickens with the gout form a novel exhibit of the Pasteur Institute in Paris when visitors are taken through the museum every day. But the chickens so afflicted are believed to mark a distinct forward step in the study of the germ theory, because Professor Metchnikoff, the distinguished scientist, believes he has succeeded in isolating a microbe responsible for this most painful ailment, and it is due to experiments made by him that the chickens suffer.

The chickens were fed a diet of horsefeed, and this food caused the increased growth of certain microbes in the intestines and produced swelling of the joints just as occurs in gout in the human being. Professor Metchnikoff is also convinced that the absorption of poisons by these same microbes of the intestines is the cause of degeneration of the organs of the body usually ascribed to old age. One of the chief degenerative changes found in old age is in the condition of the arteries. The walls become hardened and brittle. Professor Metchnikoff was convinced that a convenient place where the cause of the disease, the microbe, which was never before determined, was the result of the activity of the intestinal microbes.

Experiments on young animals with cultures from a diseased intestine brought about a hardening of the arteries which was exactly similar to that which results in the human body with what has previously been called "old age."

WIRED CONCRETE BLOCKS.

Unique Method of River Embankment Construction.

A unique method of concrete embankment construction, in which the concrete blocks are strong on wires, has been successfully used on the river Yonne in France. The idea was originated by an Italian engineer.

The bank of the river is first smoothed to a convenient level. Then the wires are strung the proper distance apart, fastened to a cable at the bottom and to a special, constructed frames at the top. Each frame, ten feet long and accommodating twenty-five wires, is in reality a bench on which the concrete blocks are placed and from which they are slipped on to the wires. The sections of these benches are alternately painted red and white to eliminate error in stringing the blocks, which are made in two sizes, 18 and 24 inches, and are shaped to fit on the wires fastened to the end sections of the frame and the other to the sections painted white.

When the blocks are in place and embankment is completed the frames are removed and the wires twisted together and wound around piles, which serve as anchors. The bottom is held down by its own weight.

The concrete protecting curbs thus made are strong and durable. The Yonne extended about five feet below the water line—Popular Mechanics.

Prevents Ships From Rolling.

A German has recently invented an apparatus to prevent ships from rolling.

The apparatus consists of U-shaped tanks extending through the hold of the vessel from port to starboard. These tanks are filled with water, which serves as the ship rolls, the effect being to oppose the rhythmic movement of the vessel. The tanks have been tested on a model of a ship, and the results were very satisfactory. The tanks are filled with water, which serves as the ship rolls, the effect being to oppose the rhythmic movement of the vessel. The tanks have been tested on a model of a ship, and the results were very satisfactory.

New Zealand's Big Tunnel.

The tunnel being constructed connecting Christchurch with Greymouth on the New Zealand government railways is to be one of the largest in the world.

The tunnel will be 10,000 feet long, and will be 15 feet wide at the top and 10 feet wide at the bottom. The tunnel will be 10,000 feet long, and will be 15 feet wide at the top and 10 feet wide at the bottom. The tunnel will be 10,000 feet long, and will be 15 feet wide at the top and 10 feet wide at the bottom.

Women Bull Fighters Barred.

The Spanish minister of the interior has issued an order by which women are prohibited from taking any active part in bullfights.

The following from the Spanish Minister of the Interior, London, is the reason assigned: "Although the practice of participating in bullfights is not expressly forbidden by law it is women, yet it is the most dangerous and feminine nature that a woman forswears seems an almost intolerable spectacle. Therefore the authorities will see to it that no woman is present at any bullfight, and that women are to appear in the arena."

THE NEW OPERA BAG.

Trimmed Reticule Important Part of Costume.

The top to the minute woman carries to evening affairs, the theater and the like, a very picturesque bag slung on long cord handles. Such a bag is pictured, and contains fan, opera glasses, vanity outfit and all the little belongings a woman likes to have at hand. It is made of rose silk embroidered in gold soutache and matches the cap of macramé lace over rose silk with trimmings of gold fringe.

First Aid to Silver Bag.

"Where's your lovely silver bag?" asked a keen eyed woman of the friend who had come to meet her. "I've left it at home," she answered. "Oh," was the plaintive answer. "I have had to stop wearing it. It leaves a dirty mark against all my light dresses, and besides, I'm afraid of wearing it out. My keys and things poke holes in the links so."

Any possessor of one of these very desirable silver bags will have experienced these troubles, but there is really as need to put the pretty things away except for dark clad occasions when nothing more serious than a handkerchief and a notebook are carried. Silver bags certainly get very dirty, but they have the advantage over leather and suede ones of being easily cleaned.

When your bag is dark and dull looking simply drop it into a bowl of hot water to which a little ammonia has been added. You will be surprised at the dirt that will roll out. A good brushing with soap and a soft nailbrush will finish the cleaning process. The bag should now be rinsed in clear hot water and rubbed with a soft towel while it is still warm.

Hardness of Vanadium.

American alloys of vanadium steel are claimed by J. M. Flannery to cut as much as 50 per cent without attention, while the best imported save needed grinding after cutting drills. The steel, best for metal cutting, seems to be that containing vanadium, 22 per cent; tungsten, 17.81 per cent; chromium, 5.92 per cent; carbon, .002 per cent; manganese, .57 per cent; silicon, .046 per cent. In the best made vanadium steel saws intended for wood cutting are reported to have cut a twenty inch sap iron pipe in half through an iron pipe in inch in diameter without injury to the teeth.

Largest Underground Waterway.

The United States reclamation service recently announced that the headwaters had met in the great Gunnison tunnel which the government is building in western Colorado to carry the water of the Gunnison river into the Sacramento valley where it is needed for irrigation. The tunnel, which will be cement lined throughout and will have a finished cross section of 50 feet by 11½ feet, will be the largest underground waterway in the world. It is six miles in length and will carry 1,800 cubic feet of water per second. Its cost will be over \$2,000,000.

General Manager—It will cost a million to equip the rolling stock with safety appliances.

Railroad President—What did it cost to build the tunnel?

"About \$100,000."

"Then I guess we'll continue to take a chance"—Life.

The dove of peace or "tribe" have a pleasant habit of being killed by the very way.

WONDER FANNING MILL

One of the many leading lines handled by the

Cockshutt Plow Co.

LIMITED

Unequalled for taking wild oats out of wheat. Has 15 sieves all made of stout sheet zinc. The screens differ in the shape and size of the perforation so as to handle all kinds and sizes of grain, wheat, barley, oats and flax. Zinc sieves do not rust nor spread like wire, and permit of great accuracy in gauging the size of the perforation even to one thousandth part of an inch. Other important features are the internal arrangement of the screens which keeps wild oats lying flat so they will be screened off, the complete arrangements for regulating the feed, the wind, and the shake of the upper and lower shoes.

Owing to variation in the size of the wheat berry in different seasons and localities, two sizes of wheat screens are made. Those for plump, full sized wheat are not furnished standard and are supplied on order.

All "Wonder" mills are furnished with extra barley gang included in the price, whereas, with other makes, they are charged extra.
